

Sandbox Testing Resource

Credit Card Testing (Sandbox Environment)

Use the following test card numbers when processing transactions in the sandbox environment. Sandbox accounts are configured with Fiserv by default unless an alternate processor has been specifically requested.

Credit Cards

- **Visa**
Card Number: 4761 5300 0111 1118
CVV: 999
- **MasterCard**
Card Number: 5137 2211 1111 6668
CVV: 998
- **Discover**
Card Number: 6011 2087 0111 7775
CVV: 996
- **American Express**
Card Number: 3710 3008 9111 338
CVV: 9997

AVS and CVV Notes

- **Fiserv** any AVS or CVV value may be entered.
- **TSYS** requires the specific CVV codes listed above. Any AVS value may be entered.

Transaction Amount Rules

- Transactions between **\$1.00 and \$100.00** should return an approval unless otherwise specified below or by the processor. If you encounter an unexpected decline, alter the amount and try again.
- **(Fiserv)** A transaction for **\$105.00** will return a generic decline.
- **(Fiserv)** A transaction for **\$101.31** will return an invalid account number decline.

- **(Fiserv)** An amount of **\$45.67** will result in a No Host Response used to simulate a Time-out Reversal.
- **(Fiserv)** Some amounts **over \$100.00** return specific response codes, with the last three digits representing the desired code.

Examples: \$101.06 = Response Code 106 // \$109.02 = Error Response 902

- **(TSYS)** Most transactions under \$1.00 will decline for various reasons

ACH Testing (Sandbox Environment)

Use the following information for ACH testing in the sandbox environment.

- Transactions **must be under \$15.00** to receive approval.
- ACH transactions will **not fully process**; a **Pending** status should be expected.

Test ACH Details

- **Checking Account Number:** Any value
- **Routing Number (Approval):** 490000018
- **Routing Number (Decline):** 490000034
